100% HEALTHY
100% EFFECTIVE

MICHEL VAILLANT

Dear horse lovers,

Discover our brand-new catalog dedicated to horse care, in which I share with you **my experience in locomotion and natural comfort, as well as my know-how and passion for the healing power of plants.**

At Michel Vaillant, we believe in the harmony between man, animal and nature. We are deeply convinced that **nature's precious treasures**, combined with the best raw materials, **can contribute to the well-being, comfort and performance of horses.**

Your animal deserves special attention to preserve its health.

Each of our products is the fruit of many years of research and experimentation.

That's why we offer a wide range of treatments adapted to each specific need: each of our elixirs responds to a targeted problem, with the highest standards of **efficacy and quality.**

On behalf of the entire Michel Vaillant team, **I would like to thank you for your trust and loyalty.** We look forward to accompanying you and your faithful companion in your quest **for natural well-being...**

Yours faithfully

Jo Vaillant

“Nature is always looking
after your well-being.
It has no other purpose.
Don't resist it.”

Henry David Thoreau

100% NATURAL CARE PRODUCTS

| We have always sought out the **best materials and manufacturing processes**, in collaboration **with recognised professionals** from the equine world.

To optimise your horse's comfort, performance and locomotion, we have developed a range of treatments with recipes directly inspired by the treasures of nature.

These intensely effective products are based on **conventional and organic plant oils, essential oils and top-of-the-range natural ingredients**.

You'll find a **high-quality range of oils, ointments, clays, balms and food supplements** to provide a complete response to your horse's needs.

Levels of effectiveness from 1 to 6 : from simple **prevention** to **extreme care**, choose the most suitable treatment for your horse and **budget**.

ORGANIC, even more powerful

Only organic plant production can fully restore the original potency of the ingredients.

3

Did you know?

WHY CHOOSE 100% NATURAL CARE PRODUCTS?

**We use only plant oils to make all our products...
for us, this choice is a real ethical choice.**

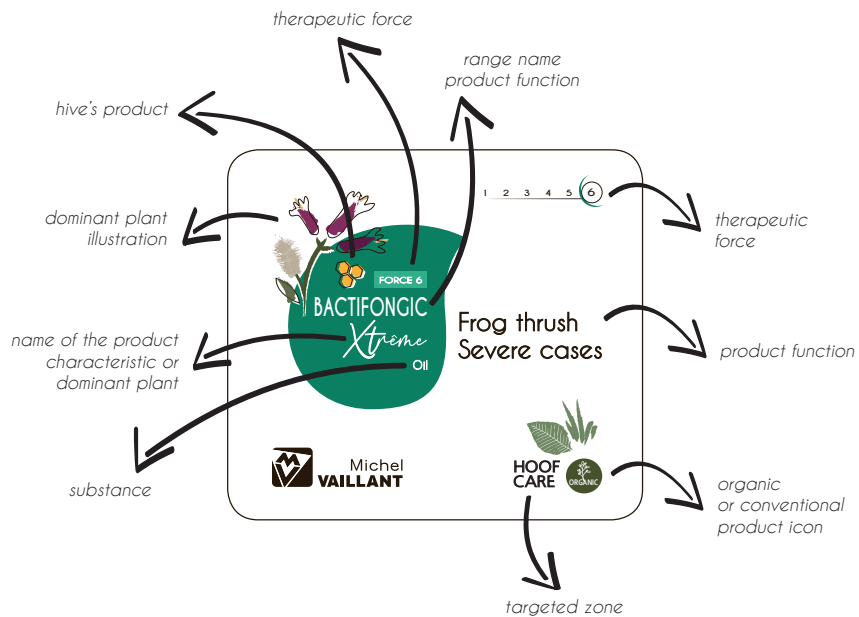

100% plant oils

0% dead animal fat - 0% petroleum by-products

For us, THE BASIC COMPONENTS OF CARE PRODUCTS MUST NOT :

- ❖ come from the distillation of **crude oil** and **coal**
- ❖ come from **dead animals**
- ❖ be refined and undergo **physical and chemical treatments to not lose all their natural qualities**

SUMMARY

Perfect
for
summer

HYDRATOPRESTO

Moisturizing Hoof Care

WHY MOISTURIZE HOOVES ?

Dry horn is generally hard and lacks suppleness.

The hoof will quickly show cracks at the base of the hoof or at the nail rivet, sometimes making shoeing difficult or fragile.

It is essential to prevent the horn from dehydrating by using natural oils, ointments and balms, whose main function is to nourish the horn.

HYDRATOPRESTO Organic Oil

Coca Force 1

Moisturizing sole and hoof wall care

INGREDIENTS

Organic plant oils Soybean , Coconut
Rich in polyunsaturated fatty acids + vitamins A and E
Organic essential oil Clove

All-round care designed to moisturise and purify the sole.
Protects, nourishes and acts as a long-term anti-dehydrating agent.

Helps promote healthy hoof growth.

Made from a combination of organic plant oils reinforced with organic essential oils and 100% natural ingredients.

External hygiene product, suitable for use in competition.

BACTIFONGIC

Frogs cleaning

WHEN SHOULD FROGS BE CLEANED?

A thrushed frog is often linked to excess humidity, which encourages infection due to the proliferation of bacteria and fungi. A thrushed frog can be easily identified by its unpleasant smell. Determine the extent of the damage: the frog is simply damaged and crumbling slightly, or it is deeply thrushed.

Supplement your horse with biotin to help it grow quality horn, clean the area thoroughly and choose the BACTIFONGIC natural care product suited to the extent of the damage.

BACTIFONGIC Organic Oil

Essentiel Force 2

Cares Purifies the frog

INGREDIENTS

Organic plant oils Soybean, Coconut, Castor, Sesame
Rich in polyunsaturated fatty acids + vitamins A and E

Essential oils Thyme, Clove, Palmarosa, Niaouli, Bay Laurel, Lemon Peel

With its Bacti & Fongic action, maintains and purifies frogs damaged by external circumstances (urine, litter, mud, damp environment).

Moisturises and leaves the horn supple.

Made from a combination of organic plant oils reinforced with essential oils and 100% natural ingredients.

External hygiene product, for use in competition.

FORTIFOOT

Fortifying hoof care

ITS HORN IS CRUMBLY AND FRAGILE?

A brittle horn is easily identifiable from the sole. It is fragile, crumbly and chalky.

This may be due to the season, poor feeding, hoof pathology (white line disease), or a horn growth defect.

Strengthen the hoof with a FORTIFOOT treatment.

We recommend combining it with a treatment of biotin.

FORTIFOOT Oil

Essentiel Force 2

Nourishes Hardens Protects

INGREDIENTS

Plant oils Coconut, Olive, Sesame, Castor
Rich in polyunsaturated fatty acids + vitamins A and E

Essential oils Clove, Lemon peel, Niaouli

Other natural product Lanolin

Recommended for crumbling hooves and horn that have become brittle. Nourishes, hardens and protects the horn while allowing it to breathe.

Helps promote healthy hoof growth.

Made from a combination of conventional plant oils chosen for daily foot care, reinforced with essential oils and 100% natural ingredients.

An external hygiene product, suitable for use in competition.

WATERHOOF

Hoof care to protect against humidity

IS THE ENVIRONMENT DAMP?

A soft horn is generally due to excess humidity.

The sole sinks noticeably under thumb pressure. In a damp environment, it is essential to protect your horse from bacteria and fungi that can lead to infection or even thrushes of the frogs.

Avoid occlusive products such as tar or juniper oil : they prevent the foot from breathing and trap bacteria inside.

As a result, the situation gets worse.

If the environment is damp or muddy, we advise you to apply a WATERHOOF organic care product regularly.

WATERHOOF Oil

Essentiel Force 2

Prevents excess humidity

INGREDIENTS

Conventional plant oils Sunflower, Coconut, Castor, Grape seed, Nigella

Rich in polyunsaturated fatty acids + vitamins A and E

Essential oils Niaouli, Rosemary, Clove

Other natural product Lanolin

FEETACTIV

Care that activates horn growth

SLOW HORN GROWTH?

At the time of your horse's regular trimming/shoeing, the professional in charge of monitoring your horse will be able to tell you whether it is necessary to stimulate horn growth. Our FEETACTIV range helps to stimulate the growth of a quality, supple and resistant horn.

A horse's normal swallowing is approximately 1 cm per month for a total renewal of around 9 to 12 months.

You can also supplement your horse with biotin and adapt its diet in order to carry out an internal/external treatment.

FEETACTIV Oil

Essentiel Force 2

Stimulates horn growth

INGREDIENTS

Plant oils Jojoba, Grape seeds, Coconut, Castor, Soyabeans

Rich in polyunsaturated fatty acids + vitamins A and E

Essential oils Clove, Lemon peel

Other natural products Biotin, Lanolin

Activates the growth of quality horn following lesions of the horny box (hoof cracks, seedy-toe, etc.). It is particularly recommended for dry feet with fragile and brittle horn.

Made from a combination of plant oils and essential oils that are extremely rich in biotin. The penetrating power of the selected natural oils, rich in polyunsaturated fatty acids, ensures that the foot remains optimally moisturised.

An external hygiene product, suitable for use in competition.

Qty

125ml

250ml

500ml

1L

USING ADVICE

Shake the product. Apply on the entire foot using the built-in brush (sole, wall). 1 to 2 times a day according to the needs of the corneal growth.

The stimulation of growth is reinforced by the massage of the coronary rim.

FEETACTIV Organic Oil

Absolu Force 3

Activates the growth of quality horn

INGREDIENTS

Organic plant oils Coconut, Jojoba, Olive, Sesame, Castor, Mustard

Rich in polyunsaturated fatty acids + vitamins A and E

Organic essential oils Lemon, Niaouli, Lavander, Rosemary, Ylang ylang

Other natural product Lanolin

Activates the growth of supple, resistant horns following horn wounds (hoof cracks, seedy-toe, etc.). It is particularly recommended for dry feet with fragile, brittle horns. Allows the horn to breathe.

Acts as a long-term anti-dehydrating agent. Helps keep feet healthy.

Made from a combination of organic plant oils reinforced with organic essential oils and 100% natural ingredients.

External hygiene product, suitable for use in competition.

Qty

Apply to the entire foot using the built-in brush (sole, wall)

1 to 2 times a day depending on corneal growth needs.

Stimulation of growth reinforced by massage of the coronary rim.

FEETACTIV Organic Ointment

Horsetail Plant Force 4

Activates and Strengthens
the growth of supple, resistant horn

INGREDIENTS

Organic plant oils Horsetail plant, Coconut, Castor, Mustard, Jojoba, Cayenne Chilli Pepper

Rich in polyunsaturated fatty acids + vitamins A and E

Organic essential oils Rosemary, Lavander, Niaouli, Ylang ylang, Lemon peel

Other natural products Lanolin, Beeswax, Curcuma

Stimulates the growth of supple, resistant horns following damage to the cornea (hoof cracks, seedy-toe, etc.).

Particularly recommended for dry feet with a fragile, brittle horn. Allows the horn to breathe.

Acts as a long-term anti-dehydrating agent. Contributes to healthy feet.

Made from a combination of organic plant oils reinforced with organic essential oils and 100% natural ingredients.

BEE LINE beehive products: natural plant materials renowned for their anti-inflammatory, cleansing and healing properties.

An external hygiene product, suitable for use in competition.

USING ADVICE

Apply to the whole foot using the built-in brush (sole, wall) 3 to 7 times a week depending on corneal growth needs. Growth is stimulated by massaging the coronary rim.

BIOTINES CHEVAL

Horse biotins - Nutritional supplements

**POOR QUALITY HORN,
DULL COAT,
SPARSE MANES?**

Biotin is a vitamin that has an effect on the whole body but particularly on the skin, which is rich in keratin. It is essential in the formation of horny envelopes, skin and coat. If your horse has damaged, soft, brittle hooves, it will need a treatment of biotin. The same goes for skin problems, a dull coat or thinning mane. BIOTINES CHEVAL comes in various forms: treats, pellets, vermicelli, etc.

**HORSE BIOTIN
Treats**

Carrot Force 3

Stimulates horn, skin and coat growth

INGREDIENTS

Dehydrated carrot (40%), Alfalfa (10%),
Grass hay, Biotin (1500mg/kg)
No sugar, no additives, no artificial flavourings,
short-distance cereals Rhône-Alpes/Auvergne

Stimulates the growth of healthy horns in the case of soft, fragile or brittle hooves, hoof cracks, seedy toe and feet ringed as a result of laminitis, for example. Also improves the growth and maintenance of epidermal tissue in cases of dry skin, dull coat and thinning mane. **Particularly recommended during moulting period.** The high proportion of alfalfa provides an important natural source of MSM (MethylSulfonylMethane). **Ideal treat for horses in pasture without a ration.** Formulated without added sugar binder, recommended for treatment post-laminitis.

Qty

500g
1 month treatment
- 1 horse

1 kg
2 months treatment
- 1 horse

3 kg
2 months treatment
- 3 horses

USING ADVICE

Break off the largest pieces (2 cm maximum) to make chewing easier
Daily dose for 1 horse weighing 500 kg 15g/day or 22.5mg of pure biotin = 3 to 5 treats corresponding to a length of approximately 6 cm
To shorten the duration of treatment and in the case of very damaged hooves, double the dose. Can be given to your horse all year round, without moderation, in order to cover your daily biotin requirements.
Very balanced Ingredients : can be consumed without risk.

HORSE BIOTIN Pellets

Apple Force 3

Stimulates horn, skin and coat growth

INGREDIENTS

Biotin, Wheat bran, Alfalfa, Calcium carbonate, Molasses, Salt, Apple flavouring

Analytical constituents Crude fibre 14.30%, Crude protein 13.50%, Crude ash (mineral matter) 13.90%, Crude fat 2.80%, Lysine 0.60%. **ADDITIONAL:** Biotin 1500 mg/kg
Short-distance cereals Rhône-Alpes/Auvergne

A genuine food supplement ultra-rich in vitamin H (pure biotin or vitamin B8) and minerals, presented in the form of highly palatable apple granules. Stimulates the growth of healthy horns in the case of soft, fragile or brittle hooves, hoof cracks, seedy-toe, ridges (following laminitis, for example). Improves the growth and maintenance of epidermal tissue in cases of dry skin, dull coats and thinning manes. The addition of alfalfa provides an important natural source of MSM (MethylSulfonylMethane), calcium and minerals: the horse also benefits from all the advantages essential for bone capital. Every day, you can improve the quality of your horse's feet with a tried and tested treatment, while at the same time improving the animal's general state of health. Antioxidant properties, helps combat demineralisation. **Particularly recommended during the moulting period. Essential for growing foals, brood mares during the last 3 months of gestation and older horses.**

Qty
750g
1.5 month treatment
- 1 horse
2kg
2 months treatment
- 2 horses
4kg
2 months treatment
- 4 horses

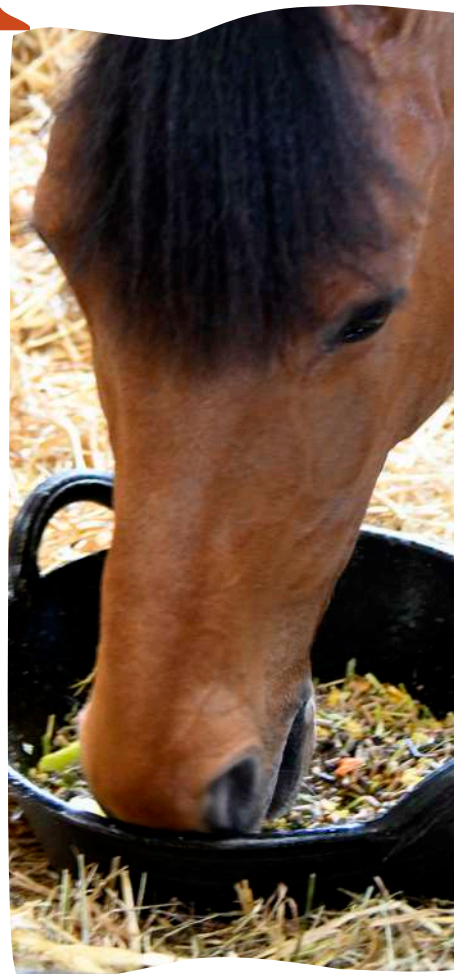

USING ADVICE

Damaged hooves Dosage 20 g/day (2 tablespoons), i.e. a daily intake of 24.7mg of pure biotin = ideal daily requirement to restructure the horn of a 500kg horse.

To shorten the duration of treatment and in the case of very damaged hooves, double the dose.

Preventive treatment can be given to your horse all year round without moderation, to cover its daily biotin requirements.

As the Ingredients of the product is very balanced, it can be consumed without risk.

Additives per kg Manganese 1500mg

Trace elements Zinc 1000mg, Copper 1000mg

Vitamins Biotin 1000 mg, folic acid 500 mg

Aromatic substances MSM 50000 mg, Bambo0 30000 mg

An innovative vermicelli food supplement that combines 2 actions:

- Optimises horn growth and quality by providing vitamin H (biotin),
- Protects joints while improving their suppleness by providing glucosamine and chondroitin.

Biotin stimulates the growth of healthy horn in the case of soft, fragile, brittle hooves, hoof cracks, seedy-toe, ridges (following laminitis, for example).

Biotin improves the growth and maintenance of epidermal tissue in cases of dry skin and dull coat.

The combined action of glucosamine sulphate and chondroitin sulphate protects the cartilage framework, slows down its degradation, relieves mild to moderate joint pain and promotes supple, strong joints.

The synergy of active plant ingredients optimises joint flexibility and promotes recovery after intensive exercise.

This product can be used in competition, during gestation, while breast-feeding and for the very young. Particularly recommended during moulting.

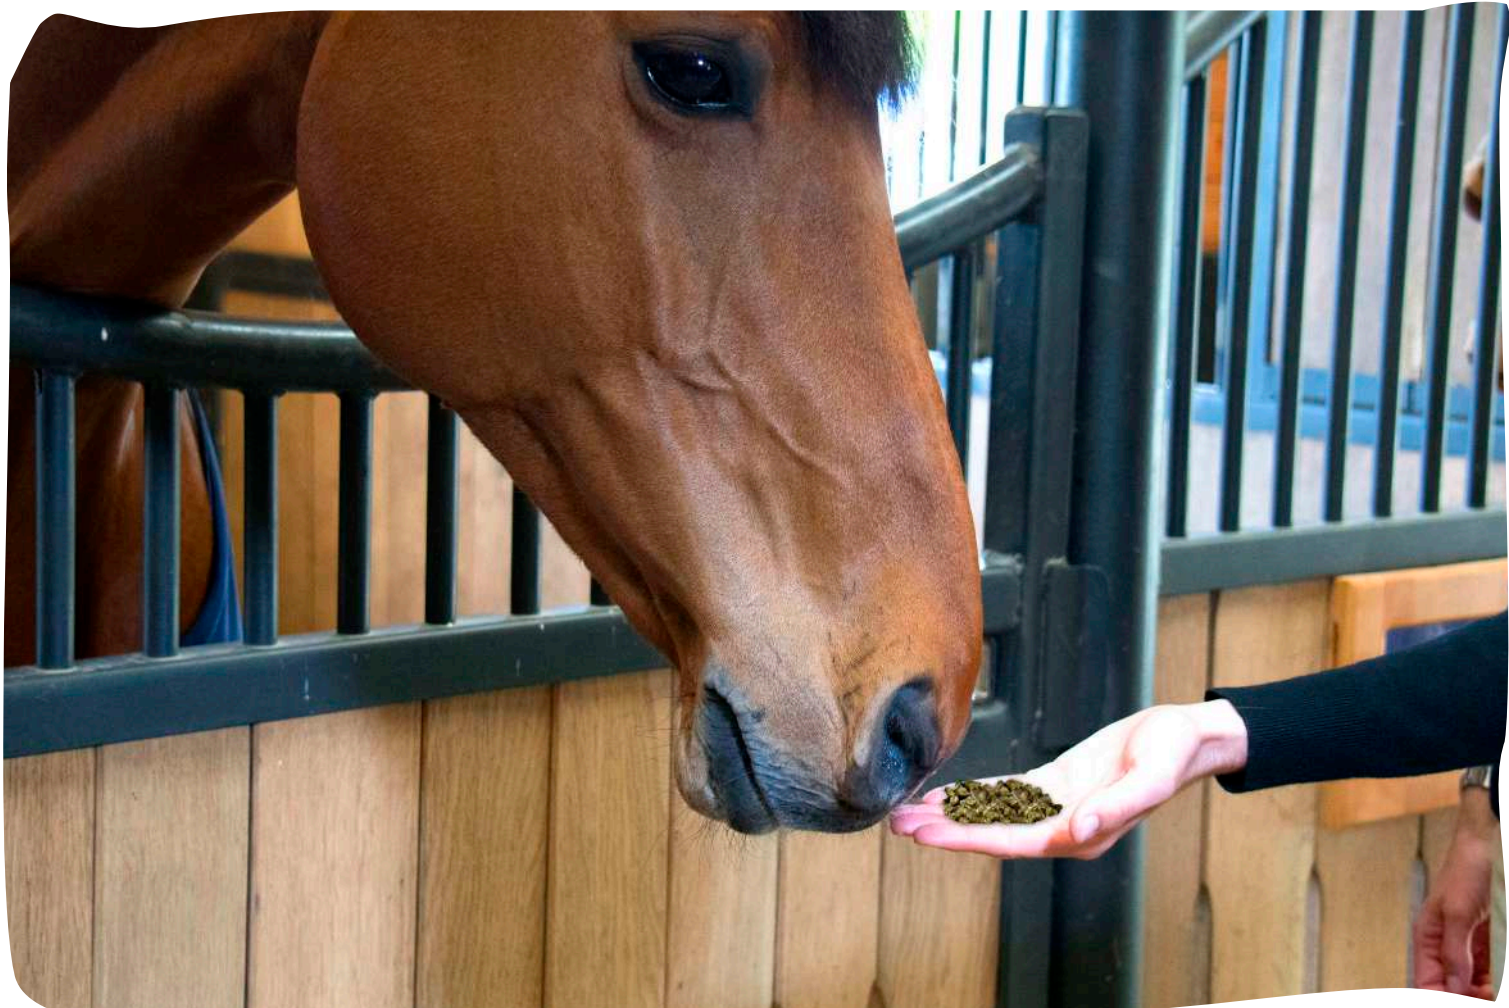

**USING ADVICE**

Minimum 2-month course. 2 scoops (30g) / day for a 500 kg horse.

HORSE BIOTIN**Pellets***CMV Omega 3 Force 4*

Healthy regeneration horn skin coat

Strengthens muscles tendons joints Facilitates digestion

INGREDIENTS

Dehydrated sainfoin, Flaxseed, Wheat bran, Sunflower, Rapeseed, Dehydrated alfalfa

Analytical constituents Crude protein: 20%, Fat: 8.5%, Crude fiber: 15.5%, Crude ash: 11.5%, Calcium: 2.2%, Phosphorus: 0.65%, Sodium: 0.4%**Vitamins** Vitamin A: 52500 IU, Vitamin D3: 5250 IU, Vitamin E: 525mg, Vitamin B8-Biotin: 150mg**Oligo-elements** Iron sulphate monohydrate 385mg - Copper sulphate 140mg - Copper glycine chelate 385mg - Copper glycine chelate 35mg - Zinc oxide 350mg - Zinc glycine chelate 87.5mg - Manganese oxide 350mg - Cobalt carbonate 0.875mg - Selenium selenite 1.33mg - Selenium inactivated selenium yeast 0,35mg - Calcium iodine 2,625mg Binder: Sepiolite 875mg

Short-distance cereals Rhône-Alpes/Auvergne

Rich in biotin. Promotes optimum regeneration of healthy horn in the case of soft, fragile or brittle hooves, hoof cracks, seedy-toe, ridges following laminitis, for example. Improves the growth and maintenance of epidermal tissue in cases of dry skin, dull coat and thinning mane. Protects joints and improves flexibility. Helps build muscle.

Sainfoin 20% In addition to its digestive properties, sainfoin maximises the assimilation of the omega-3s provided by flaxseed and improves their rate of transfer to the body's cells. Thanks to its specific tannins, sainfoin plays an interesting role in preventing gastro-intestinal parasites.

Omega 3 2.5% derived from extruded flaxseed, it acts as a muscle and joint antioxidant, protecting the sheaths of muscle and tendon fibres.

Natural chondroprotectors provide essential nutrients for maintaining joint integrity. **Biotin, brewer's yeast, vitamin B, copper-zinc and chelated manganese** - all necessary elements for the synthesis of keratin and cartilage. **Choline, carnitine, sanguinarine and organic selenium** support the general metabolism to maximise the assimilation of nutrients, making this dietary supplement highly effective. This product can be used in competition.

**USING ADVICE**

Minimum course 1 month horse 500kg 125g/day = 1 glass of 20cl i.e. a daily intake of 24.7mg of pure biotin.

2-month course if hooves badly damaged Double the dose if severe deficiency.

Rich in protein, ideal for suckling mares and foals. Use all year round, without moderation. **Ideal during the moulting period.**

FARRIERFLY

Insects repellents

GOODBYE FLIES !

When the fine weather arrives, flying insects can be a real nuisance and can damage your horse's health. Depending on the area, their presence can be unbearable. Some of these insects have an allergenic saliva that creates itches and dermatitis, others are vectors of bacterial or viral diseases. It's vital to keep these pests at bay with natural, effective treatments.

FARRIERFLY Concentrated shampoo for dilution *Insect Repellent Force 1* Insect repellent protective screen

Apply balm around eyes or wounds.

WHAT CARE FOR WHICH PATHOLOGIES?

Whether used preventively, **in conjunction with veterinary care** or exclusively, **our products provide relief** and an effective response to the many pathologies that can affect horses and their feet.

ANATOMY, CASE STUDIES, TIPS...

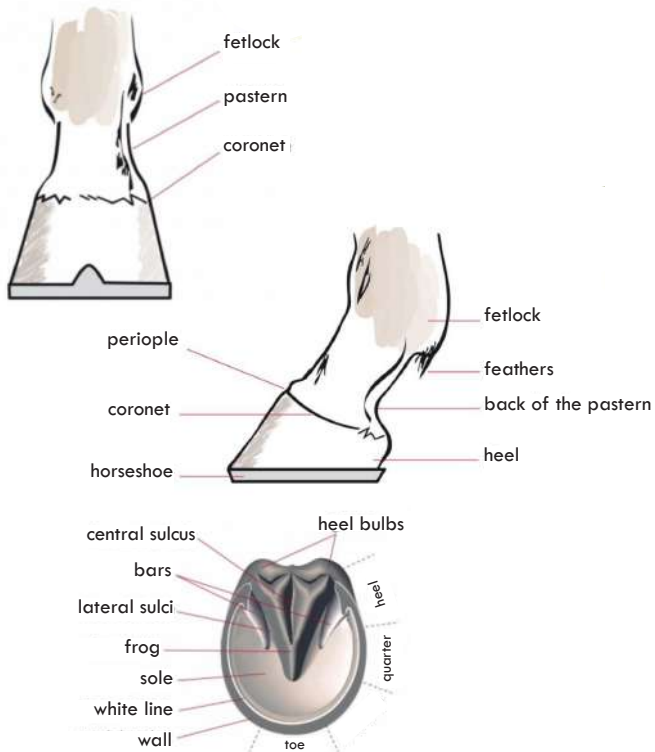

ORGANIC, even more powerful

Only organic plant production can fully restore the original potency of the ingredients.

Did you know?

Some notions of anatomy

01

THOROUGH CLEANING

Thorough cleaning is essential. Pay particular attention to the gaps, It makes all the difference!

02

APPLY FROG CARE

Frog-specific care is essential!

03

FOOT CARE

Apply a seasonal care product several times a week.

- 🌿 In **winter**, protect against **humidity** with WATERHOOF
- 🌿 In **spring**, stimulate **growth** with FEETACTIV care
- 🌿 In **summer**, **moisturize** with HYDRATOPRESTO care
- 🌿 In **autumn**, **harden** with FORTIFOOT treatments

that change everything.....

In brief

DO AND DON'T

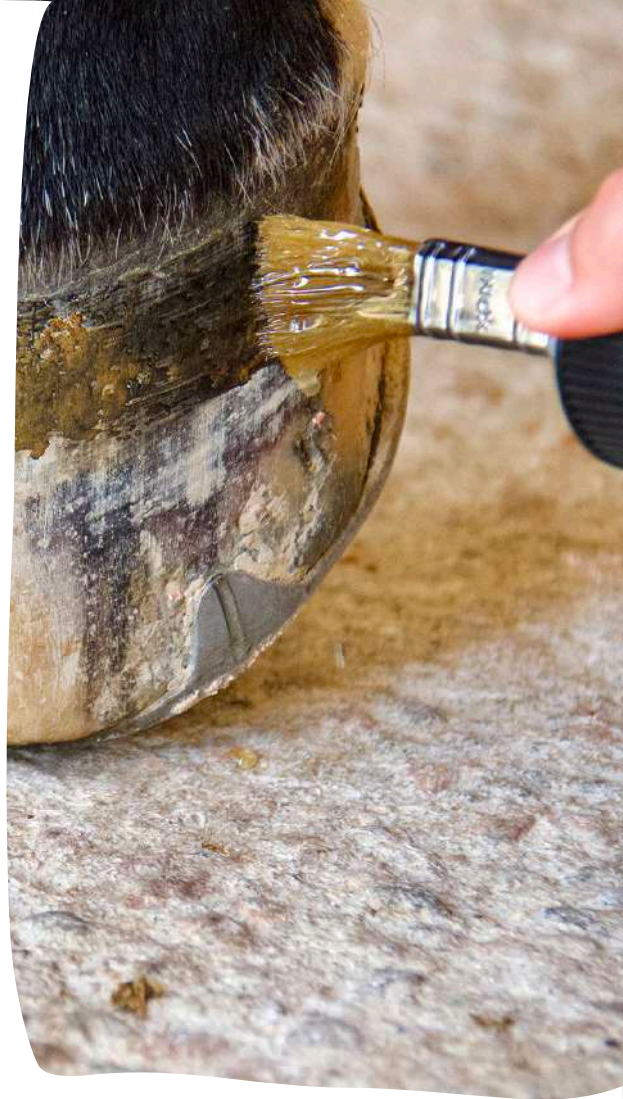

DO ✓

- 🌿 Daily foot cleaning
- 🌿 **HAVE THE FARRIER COME REGULARLY**
- 🌿 Grease feet
- 🌿 Maintain frogs

DON'T ✗

- 🌿 Use animal fats
- 🌿 Use tars
- 🌿 Not adapting care to the season
- 🌿 Tell yourself that deep frog thrush "isn't important"

How to treat

healthy frog

deep frog thrush

THE NATURAL WAY

01

METICULOUS CLEANING

There's no point in applying any kind of care product to dirt or manure - it won't have any effect. Thorough cleaning is essential.

02

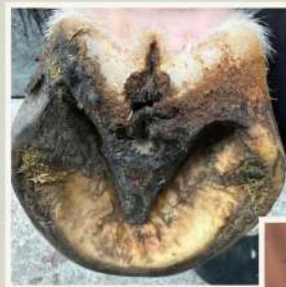

DETERMINE THE IMPORTANCE OF FROG DAMAGE

It may **simply be degraded** (crumbling slightly), or **the thrush may be deep**. Either way, **YOU MUST ACT!**

03

WHAT CARE SHOULD BE TAKEN IF THE DAMAGE IS SEVERE?

First of all, supplement your horse with biotin to rapidly grow better-quality horn. Clean thoroughly and apply **BACTIFONGIC Extrême Force 6** organic frog oil. Finish by filling in the central area with **BACTIFONGIC Force 4 fibrous paste**. It will keep the area healthy while treating thrush. See pages 14 to 19

BEFORE

Beginning of deep frog thrush.

AFTER

After one week care with Bactifongic range, frog is already doing better

WHAT IS BIOTIN?

Biotin, also known as vitamin B8, plays an essential role in cell growth in all living organisms.

WHAT IS IT USED FOR?

It contributes to the good condition of skin, coat, horn and mucous membranes.

HOW LONG DOES A treatment LAST?

A treatment lasts a minimum of two months. There is no maximum limit.

It can be administered continuously, if horn quality is poor.

in all this ?

3 REASONS FOR A TREATMENT

01

PROMOTES HOOF HEALTH

Supplementing the diet with biotin promotes hoof solidity and horn quality and growth.

02

MAINTAINS A HEALTHY COAT

Biotin helps support the production of keratin in coat and skin.

03

PROMOTES HEALTHY SKIN

Optimal levels of biotin promote the correct balance of fats in skin cells and help prevent dry skin.

The secret to stimulating growth

THE PERFECT COMBO

01

BACTIFONGIC CARE

If the ground is damp, start by applying **BACTIFONGIC Essentiel Force 2 organic frog oil**. Apply evenly to any gaps.

02

FEETACTIV CARE

Complete the treatment with **FEETACTIV Essentiel Force 2 organic oil** starting with the coronary bead, then all over the hoof to stimulate horn growth. As the treatment is highly concentrated, there's no need to apply too much... wring out the brush well and keep this oil for future use!

Tips

Finally, to make the treatment even more effective, don't hesitate to massage the coronet so that the treatment penetrates well.

Is it very hot?

HEAT RECOVERY

Help your horse to recover in hot weather and loss of electrolytes.

For use during any activity that causes heavy sweating and requires instant electrolyte replenishment : competition, transport, intense work sessions, etc. Can be used during gestation, while breast-feeding and for the very young.

Select **MOVENESS Electrolyte Force 2** page 50.
